SkuTouch Solutions Releases Enterprise Edition Version 3.0
Software enhances merchandise returns, product disposition & inventory control.

LENEXA, KANSAS (March 1, 2007) SkuTouch Solutions, a Lenexa, Kan. based technology firm specializing in reverse logistics software and services, today announced the release of SkuTouch Suite Enterprise Edition 3.0. The eagerly awaited software upgrade expands on the proprietary returns software that SkuTouch has introduced in recent years.

"As we continue to serve the growing demand for sophisticated management of returned merchandise in a multitude of industries, we must anticipate and react to client needs," said SkuTouch President, Doug Obershaw. "Our SkuTouch Enterprise Edition 3.0 takes the management of returned merchandise to the next level in terms of capacity, features, end-to-end visibility and processing capability for all sizes of clients."

SkuTouch Solutions Enterprise Edition Version 3.0 enhancements include: incoming freight forecasting, product identification and disposition, inventory control and reporting improvements. In addition to increased visibility throughout the enterprise, the addition of touch-screen capabilities increases productivity.

The SkuTouch® Software Suite, which includes Enterprise, Processor and Standard editions, is a touch-screen/voice-activated software that reduces processing, crediting and information collection time resulting in a cost savings of nearly 70%.
